Professional Expertise

I grew up on a farm in the Kroonstad and later in the Viljoenskroon area, with discipline and a good understanding of the farming environment. The hands on training on the farm is a good base of management, mechanical, electrical and physical work. Driving tractors and farming vehicles from a young age gave a sense of responsibility.

At Minolta a series of tests had to be passed to be able to be a printer Technician. The course's comprised of 86 modules. These tests took 186 hours of study which I passed with distinctions.

Comfortable working in fast paced, demanding, interdisciplinary and multicultural environments. Adept at dealing with difficult and demanding multi-stakeholders at all levels of the organization. Comfortable doing presentations and providing feedback and reports to senior levels of management. Experience with work environments in hazardous and uncomfortable places and situations

During the time studying at the Pukke I am working in the holidays at the Pharmacies (Sentrum and Arrarat) doing installation and maintenance of their systems. I am also assisting in the day to day work at the business.

Accomplishments

Education

- Vice Head boy in grade 7 at Kroon heuwel primary school
